1. Research Interests

My research interests include: the conservation of existing built heritage through inspection, diagnosis, intervention design and monitoring of buildings and bridges with historical/cultural value; the study of vernacular and sustainable architecture; exploring the mechanical properties and structural behaviour of masonry, bamboo and earthen structures through the application of non-destructive and large-scale experimental testing, specialized constitutive models and advanced non-linear numerical simulations; robustness and resilience of the built environment; as well as the development and implementation of new technologies in the architecture, construction and engineering industry such as artificial intelligence, the internet of things, structural health monitoring, asset information modelling, and digital twins. With my research, I aim at contributing to the achievement of Sustainable Development Goals 9 and 11 as adopted by the United Nations.

2. Teaching Philosophy

My teaching philosophy is centred around creating an active, inclusive, and safe learning environment that fosters the creation of deep learning knowledge among my students. I believe using technology can greatly support and enhance student learning, especially when it is applied following evidence-based best teaching practices. My goal as a Structural Engineering teacher is to develop on my students the skills and knowledge necessary for success in the field and to empower them with learning tools that will allow them to take ownership of their own learning and further professional development. I conduct myself with integrity following strict codes of conduct established by the institutions where I work, I strive to adopt diversity, equity, and inclusion principles by respecting my students' and colleagues' identity, nationality, socioeconomic level, gender, sexual orientation, disabilities, and age. I am interested in implementing a Scholarship of Teaching and Learning approach on my teaching practice to contribute to the improvement of teaching in structural engineering by publishing and sharing my own experience and expertise on educational journals and conferences.

3. Current Position

05/08/2024 - Present: Lecturer in Structural Engineering.
Department: Department of Architecture & Civil Engineering.
University: University of Bath, United Kingdom.

4. Education

01/09/2016 - 03/10/2019: PhD in Civil, Structural and Environmental Engineering.
University: Trinity College Dublin, Ireland.
Supervisor: Prof. Dermot O'Dwyer.
Thesis: Conservation of earthen vernacular architecture in Ireland. Study of the mechanical properties and the structural behaviour of cob.
Funding: Internal University funding Studentship Award.

- 01/09/2017 - 31/08/2018:** Postgraduate Certificate in Statistics.
University: Trinity College Dublin, Ireland.
Description: Base module, introduction to regression and design of experiments.
Funding: Internal University funding Studentship Award.
- 01/09/2015 - 31/08/2016:** Erasmus Mundus Advanced Master in Structural Analysis of Monuments and Historical Constructions (SAHC).
Universities: Czech Technical University, Czechia and Polytechnic University of Catalonia, Spain.
Supervisors: Prof. Sergio Henrique Pialarissi Cavalaro and Prof. Pere Roca Fabregat.
Thesis: Simulation of masonry structural behaviour using the Discrete Element Method.
Funding: Erasmus+ Scholarship.
- 01/09/2009 - 31/08/2014:** Bachelor's Degree in Civil Engineering, Structural Engineering Specialization Path.
University: University of Guadalajara, Mexico.
Supervisor: Prof. Miguel Zamora Palacios.
Thesis: Comparative analysis of plane frames' structural behaviour considering the effect of end length offsets.
- 01/07/2012 - 30/06/2013:** International Academic Exchange.
University: National Institute of Applied Sciences (INSA) Lyon, France.
Funding: Mexfitec Scholarship.

5. Research Experience

- 01/05/2024 - 04/08/2024:** Visiting Researcher.
Institution: Delft University of Technology, Netherlands.
Description: Hosted at the Faculty of Civil Engineering and Geosciences I work within the Department of Materials, Mechanics, Management & Design (3MD) on the Secondment of the DTADD project.
Funding: Marie Skłodowska-Curie Actions (MSCA) grant agreement No 101066739.
- 01/02/2024 - 30/04/2024:** ICCROM Fellow.
Institution: International Centre for the Study of the Preservation and Restoration of Cultural Property (ICCROM).
Description: The main goal of this fellowship was to explore how the architecture, engineering, construction, management, operation, and conservation (AECMO&C) industry can adapt and be better prepared to embrace novel Industry 5.0 concepts ultimately resulting in enhanced built cultural heritage conservation practices.
Funding: Research Stay Abroad Scholarship, Research Council of Norway.
- 01/11/2022 - 31/01/2024:** MSCA Postdoctoral Research Fellow.
University: Oslo Metropolitan University, Norway.
Description: My MSCA fellowship had two specific objectives. The first one is to build digital twin (DT) models of heritage/conventional bridges to assess and identify the highest performing anomaly detection algorithm (ADA) for damage and/or significant decay detection. Its second objective is to develop an ADA-informed open-source decision-making tool based on a reliability-based bridge management approach, to assess the need for bridge intervention while explicitly considering their cultural heritage value.
Funding: Marie Skłodowska-Curie Actions (MSCA) grant agreement No 101066739.
Website: <https://alejandroslomet.github.io/>
- 01/11/2020 - 31/10/2022:** Postdoctoral Researcher.
University: Sapienza University of Rome, Italy.
Description: The research project in which I participated focused on the study of the structural behaviour of masonry with the use of a non-standard limit analysis method implemented through the ALMA 2.0 program and on this software extension.
Funding: Internal University funding.

Summer 2018: Visiting Researcher.
University: University of Cantabria, Spain.
Description: International research collaboration to design the experimental campaign on the use of minor-destructive tests to determine the mechanical properties of cob.
Funding: Internal University funding Studentship Award.

6. Received Funding/Fellowships/Awards

- **2024 MCAA Micro Grant:** *Marie Curie Alumni Association*. 820 € received to finance my participation in the EuroScience Open Forum (ESOF) 2024 at Katowice, Poland.
- **2024 Research Stay Abroad Scholarship:** *Research Council of Norway*. Around 8000 € received to finance my stay during my ICCROM Fellowship in Rome, Italy, for the period from 01 March to 30 April 2024.
- **2024 ICCROM Visiting Fellowship:** *International Centre for the Study of the Preservation and Restoration of Cultural Property (ICCROM)*. Fellowship awarded to conduct a research proposal on “Industry 5.0 Concepts and Enabling Technologies, Towards an Enhanced Conservation Practice”, for the period from 01 February to 30 April 2024.
- **2023 Project Establishment Support:** *Research Council of Norway*. Around 5000 € received after the successful completion and submission of an European Research Council Starting Grant (ERC StG).
- **2023 Erasmus + Staff Mobility Grant:** *Oslo Metropolitan University*. Around 1200 € which covered course fees, transportation, accommodation, and food expenses to participate in the Academic Leadership course, delivered by the European Academy of Innovation.
- **2022-2024 Marie Skłodowska-Curie Actions Individual Fellowship:** *Oslo Metropolitan University/Delft University of Technology*. Around 227,000 € which cover living allowance, mobility allowance, family allowance, research, training, and networking contributions as well as management and indirect contributions.
- **2020-2021 Internal University funding:** *Sapienza University of Rome*. Around 50,000 € which covered health insurance, travel expenses and a monthly stipend of 1600 €.
- **2016-2019 Internal University funding Studentship Award:** *Trinity College Dublin*. Around 100,000 € which covered tuition fees, research expenses and a monthly stipend of 1 200 €.
- **2015-2016 Erasmus+ Scholarship:** *Czech Technical University/ Polytechnic University of Catalonia*. Around 25,000 € which covered tuition fees, health insurance and a monthly stipend of 1 000 €.
- **2012-2013 Mexfitec Scholarship:** *University of Guadalajara/ National Institute of Applied Sciences Lyon*. Around 20,000 €, which covered tuition fees, return flight Mexico-France, two-months French course, health insurance and a monthly stipend of 800 €.

7. Tracked Record

As of 19/09/2024 I have published a total of 18 peer-reviewed journal papers, 10 peer-reviewed conference papers, 3 conference posters or presentations, 3 dissertations, 12 databases and a number of other open science related publications.

Scopus: h-index:6, citations:149, documents:25.
Web of Science: h-index:6, citations:101, documents:19.
Google Scholar: h-index:8, citations:224, documents:64.
ResearchGate: h-index: 7 citations: 204, research elements: 49.

8. Publications

Peer-reviewed scientific journal papers:

1. **Alejandro Jiménez Rios**, Margarita L. Petrou, Rafael Ramirez, Vagelis Plevris, and Maria Nogal (2024) Industry 5.0, Towards an Enhanced Built Cultural Heritage Conservation Practice. *Journal of Building Engineering*. *The purpose of this article is to shed light on how the architecture, engineering, construction, management, operation, and conservation industry can adapt and better prepare to embrace novel Industry 5.0 principles and enabling technologies, ultimately resulting in enhanced conservation practices for the built cultural heritage environment.* [DOI: 10.1016/j.jobe.2024.110542](https://doi.org/10.1016/j.jobe.2024.110542).

2. **Alejandro Jiménez Rios**, Mohamed El Amine Ben Seghier, Vagelis Plevris, and Jian Dai (2024) Explainable ensemble learning framework for estimating corrosion rate in suspension bridge main cables. Results in Engineering. *In this study, a robust framework is proposed to predict the annual corrosion rate in main cables of suspension bridges, while investigating the impact of the surrounding environmental factors on this process.* [DOI: 10.1016/j.rineng.2024.102723](https://doi.org/10.1016/j.rineng.2024.102723).
3. Arce, A., **Jiménez Rios, A.**, Tomic, I., & Biggs, D. (2024) Structural Analysis of the Sympathetic Restoration and Conservation of the Gopinath Temple, Kathmandu, Nepal. Heritage. *In this paper, the case study of the earthquake-damaged Gopinath temple is discussed. First, an initial visual inspection phase and the following diagnosis of the structure are discussed. A sympathetic intervention proposal capable of increasing the temple's safety level, and based on the addition of timber plates, has resulted in substantial improvements in the lateral behavior of the structure.* [DOI: 10.3390/heritage7060151](https://doi.org/10.3390/heritage7060151).
4. **Jiménez Rios, A.**, Petrou, M. L., Ramirez, R., Plevris, V., & Nogal, M. (2024) Industry 5.0 concepts and enabling technologies, towards an enhanced conservation practice: systematic literature review protocol. Open Research Europe. *This paper outlines the protocol adopted to conduct a systematic literature review with the aim of exploring how the Architecture, Engineering, Construction, Management, Operation, and Conservation (AECMO&C) industry can adapt and be better prepared to embrace novel Industry 5.0 principles and enabling technologies, ultimately resulting in enhanced conservation practices for the built cultural heritage environment.* [DOI: 10.12688/openreseurope.17505.1](https://doi.org/10.12688/openreseurope.17505.1).
5. Nela, B., **Jiménez Rios, A.**, Pingaro, M., Reccia, E., & Trovalusci, P. (2023) Masonry arches simulations using cohesion parameter as code enrichment for limit analysis approach. International Journal of Masonry Research and Innovation. *In this paper, the cohesion incorporation is calibrated for a variety of in-plane applications, accounting for the joints' indirect tensile strength, that can simulate the strengthening measures.* [DOI: 10.1504/IJMRI.2024.135236](https://doi.org/10.1504/IJMRI.2024.135236).
6. **Jiménez Rios, A.**, Georgioudakis, M. S., Song, Y., & Ruiz-Capel, S. (2023) Editorial: Methods and Applications in Computational Methods in Structural Engineering. *Editorial of the "Computational Methods in Structural Engineering" Research Topic in the Frontiers in Built Environment journal which highlights the transformative power of computational methods, showcasing their potential to revolutionize the way we design, analyze, and assess the structures.* [DOI: 10.3389/fbuil.2023.1339541](https://doi.org/10.3389/fbuil.2023.1339541).
7. Plevris, V., Papazafeiropoulos, G., & **Jiménez Rios, A.**, (2023) Chatbots Put to the Test in Math and Logic Problems: A Comparison and Assessment of ChatGPT-3.5, ChatGPT-4, and Google Bard. AI. *Our study unveils the secrets behind three digital wizards, ChatGPT-3.5, ChatGPT-4, and Google Bard, as they engage in a thrilling showdown of mathematical and logical prowess.* [DOI: 10.3390/ai4040048](https://doi.org/10.3390/ai4040048).
8. **Jiménez Rios, A.**, (2023) Learning from the Past: Parametric Analysis of Cob Walls. Applied Sciences. *In this paper, a series of response surfaces and parametric equations with which it is possible to compute safety factors and collapse multipliers of existing cob vernacular walls (within the range of values studied) are provided.* [DOI: 10.3390/app13159045](https://doi.org/10.3390/app13159045).
9. **Jiménez Rios, A.**, Nela, B., Pingaro, M., Reccia, E., & Trovalusci, P. (2023) Parametric analysis of masonry arches following a limit analysis approach: influence of joint friction, pier texture and arch shallowness. Mathematics and Mechanics of Solids. *In this paper, parameters such as pier texture, joint friction angle, and arch shallowness, namely shallow, semi-circular, and pointed arches, were investigated under three scenarios: horizontal, concentrated vertical live load applied at mid-span and quarter-span.* [DOI: 10.1177/10812865231175385](https://doi.org/10.1177/10812865231175385).
10. **Jiménez Rios, A.**, Ruiz-Capel, S., Plevris, V., & Nogal, M. (2023) Computational Methods Applied to Earthen Historical Structures. Frontiers in Built Environment. *This paper compiles, summarizes, and highlights the latest developments and implementations of computational methods for the study of earthen historical structures. Future trends, opportunities, and challenges are discussed.* [DOI: 10.3389/fbuil.2023.1219108](https://doi.org/10.3389/fbuil.2023.1219108).
11. **Jiménez Rios, A.**, Plevris, V., & Nogal, M. (2023) Bridge management through digital twin-based anomaly detection systems: A systematic review. Frontiers in Built Environment. *This paper, collects and synthesizes state-of-the-art knowledge and information about how bridge information modelling, finite elements, and bridge health monitoring are combined and used in the creation of digital twins (DT) of bridges, and how these models could generate damage scenarios to be used by anomaly detection algorithms for damage detection on bridges, especially in those bridges with cultural heritage.* [DOI: 10.3389/fbuil.2023.1176621](https://doi.org/10.3389/fbuil.2023.1176621).
12. Nela, B., **Jiménez Rios, A.**, Pingaro, M., Reccia, E., & Trovalusci, P. (2022) Limit analysis of locally reinforced masonry arches. Engineering Structures. *In this paper, the influence of partial reinforcement on the structural response of masonry arches is studied.* [DOI: 10.1016/j.engstruct.2022.114921](https://doi.org/10.1016/j.engstruct.2022.114921).
13. **Jiménez Rios, A.**, Nela, B., Pingaro, M., Reccia, E., & Trovalusci, P. (2022) Rotation and sliding collapse mechanisms for in plane masonry pointed arches: statistical parametric assessment. Engineering Structures.

In this paper, the effects that different geometrical (slenderness and sharpness) and mechanical (friction and cohesion) parameters have on the in-plane structural response of masonry pointed arches are investigated. Two load scenarios are studied: vertical self-weight plus a proportional horizontal live load and vertical self-weight plus a vertical concentrated live load applied to individual voussoir. DOI: [10.1016/j.engstruct.2022.114338](https://doi.org/10.1016/j.engstruct.2022.114338).

14. **Jiménez Rios, A.**, Pingaro, M., Reccia, E., & Trovalusci, P. (2022) Statistical assessment of in-plane masonry panels using limit analysis with sliding mechanism. *ASCE Journal of Engineering Mechanics*, special issue “Recent advances on the mechanics of masonry structures”. *In this paper the effects that different geometrical (panel ratio, block ratio, bond type) and mechanical (friction ratio) parameters have on the in-plane structural response of brick masonry panels are investigated. DOI: [10.1061/\(ASCE\)EM.1943-7889.0002061](https://doi.org/10.1061/(ASCE)EM.1943-7889.0002061).*
15. **Jiménez Rios, A.**, & O'Dwyer, D. (2020) Experimental validation of the application of the flat jack in cob walls. *Construction and building materials*. 254, p.119148. *The purpose of the experimental campaign presented in this paper was to assess the feasibility of the technique to measure the average compressive levels of stress in existing cob walls and determine their mechanical properties. DOI: [10.1016/j.conbuildmat.2020.119148](https://doi.org/10.1016/j.conbuildmat.2020.119148).*
16. **Jiménez Rios, A.**, & O'Dwyer, D. (2020). Data collected from the experimental validation for the application of flat jack tests in cob walls. *Data in brief*. 31, p.105764. *It contains data collected during the consolidation process of six cob wallettes and data collected after single and double flat jack test were applied for the first time to a set of cob wallettes at the laboratory facilities of the Department of Civil, Structural and Environmental Engineering at Trinity College Dublin. DOI: [10.1016/j.dib.2020.105764](https://doi.org/10.1016/j.dib.2020.105764).*
17. **Jiménez Rios, A.**, & O'Dwyer, D. (2020). Adaptations of the flat jack test for its application in cob walls. *MethodsX*. 7, p.101003. *Two standards have been developed for the application of the technique in masonry walls and this paper presents the adaptation of those methods for its application in cob walls. DOI: [10.1016/j.mex.2020.101003](https://doi.org/10.1016/j.mex.2020.101003).*
18. **Jiménez Rios, A.**, & O'Dwyer, D. (2019). Numerical modelling of cob's non-linear monotonic structural behaviour. *International Journal of Computational Methods*. 17, p.1940013. *This paper presents the results obtained of the simulation of cob's nonlinear monotonic behaviour using two well-known finite element commercial packages. DOI: [10.1142/S0219876219500464](https://doi.org/10.1142/S0219876219500464).*

Peer-reviewed conference papers published in conference proceedings:

1. **Jiménez Rios, A.** (2024) First findings on the mechanical analysis of cob using a Discontinuity Layout Optimization (DLO) approach. Presented at the 2nd RILEM International Conference on Earthen Construction, Edinburgh, United Kingdom. *In this paper, an alternative simulation tool known as Discontinuity Layout Optimization (DLO) has been explored to try to simulate cob's mechanical behaviour. DOI: [10.1007/978-3-031-62690-6_24](https://doi.org/10.1007/978-3-031-62690-6_24).*

 8. **Jiménez Rios, A.**, & O'Dwyer, D. W. (2019). External post-tensioning system for the strengthening of historical stone masonry bridges. Presented at the 11th International Conference on Structural Analysis of Historical Constructions, Cuzco, Peru. *The objective of this paper is to present the evaluation of the feasibility of the use of an external post-tensioning arrangement to strengthen historical stone masonry bridges. The arrangement proposed is an alternative to those already existent and developed by other authors. DOI: [10.1007/978-3-319-99441-3_168](https://doi.org/10.1007/978-3-319-99441-3_168).*
 9. **Jiménez Rios, A.**, & O'Dwyer, D. (2018). Earthen buildings in Ireland. Presented at the 6th International Congress on Construction History, Brussels, Belgium. Shortlisted within the top 10 best papers presented by PhD Students. *The objective of this paper is to present a summarized and concise picture of the present situation of the remaining earthen buildings in the country, identify their main characteristics, the values that make such buildings important, evaluate their vulnerability as vernacular architectural style and therefore, understand and better approach any future intervention on such kinds of structures. DOI: [10.5281/zenodo.7494070](https://doi.org/10.5281/zenodo.7494070).*
 10. **Jiménez Rios, A.**, & O'Dwyer, D. (2018). FEM non-linear modelling of cob using ANSYS. Presented at the 9th International Conference on Computational Methods, Rome, Italy. *The aim of this paper is to evaluate the available material models' suitability for the modelling of cob's structural behaviour in one of the most used FEM software in the market. DOI: [10.5281/zenodo.7494038](https://doi.org/10.5281/zenodo.7494038).*

Book chapters:

1. **Jiménez Rios, A.** *et al.* (Under development). Enhancing the resilience of existing bridges to short- and long-term impact of climate change. IABSE Task Group 5.8 Resilience of Existing Structures. *The chapter will deal with the definition of resilience at a structure level, for existing structures, beginning with the consequences of failure or service disruption of a single or combination of components from a specific structure and following to analyse the consequences to the network level.*
2. **Jiménez Rios, A.** (Under review). Cob Vernacular Architecture Conservation and Its Contribution Towards a Sustainable Built Environment. In book: Sustainable Materials for the Built Environment. Editor: Dorian Hanaor. Springer. *In this chapter, the importance of cob vernacular heritage conservation and how this can contribute towards a sustainable built environment with an emphasis on the sustainable properties of this material is discussed.*

Dissertations:

1. **Jiménez Rios, A.** (2020). Conservation of earthen vernacular architecture in Ireland. Study of the mechanical properties and the structural behaviour of cob. PhD thesis. Trinity College Dublin. *The thesis presents a summarized and concise picture of the present situation of the remaining earthen buildings in Ireland, identifies their main characteristics, the values that make such buildings important, evaluates their vulnerability as vernacular architectural style and therefore, allows to understand and better approach any future intervention on such kinds of structures. DOI: [10.5281/zenodo.7492403](https://doi.org/10.5281/zenodo.7492403).*
2. **Jiménez Rios, A.** (2016). Simulation of structural behaviour of masonry using discrete element modelling. Master thesis. Polytechnic University of Catalonia, Spain. *The objective of this master thesis is to evaluate the applicability of DEM to simulate the structural behaviour of masonry at a micro and macro-scale level, reproducing the response in terms of deflections, ultimate load and failure modes. DOI: [10.5281/zenodo.7492479](https://doi.org/10.5281/zenodo.7492479).*
3. **Jiménez Rios, A.** (2014). Comparative analysis of plane frames' structural behaviour considering the effect of end length offsets. Bachelor thesis. University of Guadalajara, Mexico. *The purpose of this thesis was to present a more realistic model to describe the structural response of plane frames by considering the effect*

that the actual geometrical dimensions of the nodes have in terms of lateral displacements. [DOI: 10.5281/zenodo.7492520](https://doi.org/10.5281/zenodo.7492520).

Conference posters and presentations:

1. Nela, B., **Jiménez Rios, A.**, Pingaro, M., Reccia, E., & Trovalusci, P. (2022). A limit analysis approach to the assessment of masonry arch structures under the influence of fundamental parameters. Presented at the 11th International Civil Engineering, Infrastructure and Environment Conference (IC-CEIE) 2022, Kosovo. *Research on critical parameters affecting the safety levels of piers under the thrust of arches is carried out using an in-house code (ALMA) that uses limit analysis as a rigid block approach to modelling masonry with frictional joints.* [DOI: 10.5281/zenodo.7580693](https://doi.org/10.5281/zenodo.7580693).
2. Nela, B., **Jiménez Rios, A.**, Pingaro, M., Reccia, E., & Trovalusci, P. (2022). Limit analysis for masonry arches: influence of pier texture, arch shallowness, and joint friction. Presented at the XXV CONVEGNO AIMETA. *Using an in-house code that utilizes limit analysis as a rigid block approach to modelling masonry with frictional joints, a study on the crucial parameters impacting the safety level of piers under the thrust of arches is performed.* [DOI: 10.5281/zenodo.7579527](https://doi.org/10.5281/zenodo.7579527).

9. Academic Experience

2024-Present: Lecturer.

Activities: Lecturer at the Department of Architecture & Civil Engineering in the following undergraduate and graduate courses:

- MSc Conservation of Historic Buildings.
 - AR50473 Structural Conservation.
- BEng and MEng in Civil Engineering/Structural Engineering and Architecture.
 - AR30315 Dissertations.

University: University of Bath, UK.

2023: Lecturer.

Activities: Co-Lecturer at the Department of Built Environment in the following undergraduate and graduate courses:

- BYTS2500 Concrete Constructions.
- MABY4100 Finite Element Method in Structural Analysis.

University: Oslo Metropolitan University, Norway.

2021: New Master Program on Civil Engineering Creation Committee Member.

Activities: I participated in the committee in charge of designing and implementing a new Master program in the field of Civil Engineering at the Department of Civil and Topography Engineering.

University: University of Guadalajara, Mexico.

2019: Assessment Assistant.

Activities: Support of Trinity Assessment Fellows to map and analyse assessment practices within Schools across the University. Digital badge on programme-focused assessment.

University: Trinity College Dublin, Ireland.

2016 – 2019: Teaching Assistant.

Activities: Teaching assistant at the following engineering courses of the Departments of Civil, Structural and Environmental Engineering and Department of Mechanical Engineering:

- 2E9 Engineering design.
- 3A2 Structural design.
- 2E8 Materials.
- 3E4 Innovation and entrepreneurship.
- 2E4 Solids and structures.
- 4E6 Advanced theory of structures.
- 3B3 Mechanics of solids.
- C05 Spatial analysis using GIS.

University: Trinity College Dublin, Ireland.

2018 – 2019: Workshops.

Activities: Organization and facilitation of three one-day workshops on conservation, vernacular architecture, earthen construction techniques and sustainability.

University: Trinity College Dublin, Ireland.

10. Pedagogical Education

2023: Teaching and Learning in Higher Education.
Description: Compulsory qualification offer that meets the minimum requirement for basic pedagogical competence for academic staff at universities and colleges:

- Student learning in higher education.
- Designing teaching in higher education.
- Assessment and evaluation in higher education.
- Forms of knowledge in professional education.
- Research supervision.

University: Oslo Metropolitan University, Norway.

2022: 10th Online E-Learning Seminar for University Professors.
Description: 1) Assessment in ICT-supported learning environments, 2) Online game-based learning, 3) The transformation of teaching in online learning environments, 4) Strategies for teaching science and technology online and 5) Strategies for teaching social sciences online.

University: The Catholic University of "Santa Teresa de Jesús de Ávila" (UCAV), Spain.

2018: Reflective Teaching Assistantship Course.
Description: Introduction to current learning theories and teaching practices within higher education. Practical application during an undergraduate lab demonstration.

University: Trinity College Dublin, Ireland.

2016: CAPSL Postgraduate Teaching Assistant Workshops.
Description:

- How students learn?
- Session planning.

University: Trinity College Dublin, Ireland.

11. Supervising Experience

2023: Tilting Table Tests of Masonry Assemblies.
Students: Claire Ristow, Onni Heino, Quentin Pierson, Kathy Chhean, and Lara Smit
Context: [European Project Semester \(EPS\)](#).
Supervisor: **Dr. Alejandro Jiménez Rios**.
Degree: Bachelor thesis.
Institution: Oslo Metropolitan University, Norway.

2023: [Structural damage identification with non-destructive vibrational experiments](#).
Student: Merhawi Misgina Bayre.
Advisors: Dr. Vagelis Plevris and **Dr. Alejandro Jiménez Rios**.
Degree: Master thesis.
Institution: Oslo Metropolitan University, Norway.

12. Examiner Experience

2023: Towards more eco-efficient Ultra High-Performance Concrete.
Students: Berhane Desta Teame and Natnael Russom Afeworki.
Advisors: Dr. Mahdi Kioumars and Dr. Sarra Drissi.
Degree: Master thesis.
Institution: Oslo Metropolitan University, Norway.

2023: Integrating Innovative Technologies for Structural Assessment and Optimisation in Building Design.
Students: Atle Berczelly Schwach and Jacob Olsson Løkhaug.
Advisors: Dr. Awais Ahmed and Karoline Baksaas Hersleth.
Degree: Master thesis.
Institution: Oslo Metropolitan University, Norway.

13. Mentorship Experience

2022-Present: MSCA Grant Preparation Mentoring.

Activities: As a successful applicant of the competitive MSCA Individual Fellowship grant scheme, I have provided advice and guidance to people interested in preparing a competitive proposal to get funding from the European Union.

2013-Present: Academic Career Path Mentoring.

Activities: Based on my personal experience, I have provided advice and guidance to people interested in pursuing an academic career in terms of scholarship and grant schemes applications.

14. Academic Administration Experience

2022-2024: Administrator of the Official Website of the Structural Engineering Research Group (SERG) at the Department of Built Environment (DBE), Faculty of Technology, Art, and Design (TDK).

Institution: Oslo Metropolitan University, Norway.

URL: <https://uni.oslomet.no/serg/>

2016-2019: Exams Invigilator.

Institution: Trinity College Dublin, Ireland.

Description: Ensuring that examinations commence, continue, and conclude in an orderly and timely manner, and that students are kept under constant and effective supervision throughout an examination.

 Maria Nogal (Delft University of Technology, Netherlands).

2024: SS35: Digital Twins and industry 5.0: towards a sustainable bridge maintenance, safety, and management holistic approach.
Conference: [12th International Conference on Bridge Maintenance, Safety and Management \(IABMAS](#)

[2024](#)).

Co-Organizers: **Alejandro Jiménez Rios** (Oslo Metropolitan University, Norway).
Vagelis Plevris (Qatar University, Qatar).
Maria Nogal (Delft University of Technology, Netherlands).

2023: Scientific Committee Member.

Conference: [2nd International conference on civil infrastructure and construction \(CIC\)](#).

2023: MS23: Novel data-driven approaches in modelling, assessment, inspection, repairing, strengthening and management of structures.

Conference: [9th International Conference on Computational Methods in Structural Dynamics and Earthquake Engineering \(COMPDYN\)](#).

Co-Organizers: Vagelis Plevris (Qatar University, Qatar)
Alejandro Jiménez Rios (Oslo Metropolitan University, Norway)
German Solorzano (Oslo Metropolitan University, Norway)
Mohamed El Amine Ben Seghier (Institute of Surface Science, Germany).

2023: MS3: Advances in soft computing and optimization methods in engineering.

Conference: [15th International Conference on Evolutionary and Deterministic Methods for Design, Optimization and Control \(EUROGEN\)](#).

Co-Organizers: Vagelis Plevris (Qatar University, Qatar)
German Solorzano (Oslo Metropolitan University, Norway)
Sadjad Gharehbaghi (Sharif University of Technology, Iran)
Alejandro Jiménez Rios (Oslo Metropolitan University, Norway)

17. Scientific and professional memberships

2023 – Present: Europa Nostra.

2023 – Present: International Council on Monuments and Sites (ICOMOS) Norge.
[International Scientific Committee on the Analysis and Restoration of Structures of Architectural Heritage \(ISCARSAH\)](#)

2023 – Present: International Union of Laboratories and Experts in Construction Materials, Systems and Structures (RILEM).

[Technical Committee BEC: Bio-stabilised earth-based construction: performance-approach for better resilience.](#)

[Technical Committee MAE: Mechanical performance and durability assessment of earthen elements and structures.](#)

[Technical Committee PEM: Processing of earth-based materials.](#)

2022 – Present: International Association for Bridge and Structural Engineering (IABSE).

[Task Group 5.8: Resilience of existing structures.](#)

2020 – Present: Colegio de Ingenieros Civiles del Estado de Jalisco, Structural Engineering Technical Session

2019 - Present: International Association for Bridge Maintenance and Safety (IABMAS).

2019 - Present: International Network for Traditional Building, Architecture and Urbanism (INTBAU).

2019 - Present: European Architectural History Network (EAHN).

2018 - 2020: Earth Building UK and Ireland (EBUKI).

2017 - 2020: Engineers Ireland (EI).

18. Evaluator of scientific proposals

2024: Expert Scientific Evaluator.

Institution: [Luxembourg National Research Fund](#).

Proposal type: FNR CORE.

2024: Expert Scientific Evaluator.

Institution: [Chilean National Agency for Research and Development \(ANID\)](#).

Proposal type: Fondecyt Research Initiation.

19. Participation per invitation to scientific seminars/conferences

2024: Industry 5.0 and the Built Environment.

Event: [IDM Colloquium Series 2024](#).

Organizers: Integral Design and Management Section, Delft University of Technology, Netherlands.

2024: Industry 5.0 Concepts and Enabling Technologies, Towards an Enhanced Conservation Practice.

Event: [ICCROM Fellowship Talks](#).

Organizers: International Centre for the Study of the Preservation and Restoration of Cultural Property (ICCROM), Italy.

2021: Mechanical Properties of Existing Cob Walls.

Event: [NET+WORKING BASEhabitat Hybrid Summer School](#).

Organizers: BaseHabitat, University of Art and Design Linz, Austria.

2021: Conservation of Earthen Vernacular Buildings with an emphasis on minor destructive tests (MDT) and cob mechanical properties.

Event: [Ruins to Riches, Revive, Repurpose, Reimagine Our Traditional Buildings](#).

Organizers: Ulster Architectural Heritage, Armagh City Banbridge & Craigavon and the Department for Communities, UK.

20. Other Education

Summer schools and specialized courses:

2023: 8th CISM-ECCOMAS Advanced School on Scientific Machine Learning in Design Optimization.

Description: The course provided a basic understanding of the classic engineering design process and identified potential usage of artificial intelligence in this context. It covered basic theory of machine learning concepts suitable for (i) geometry representation, (ii) model order reduction, (iii) optimization, and (iv) uncertainty quantification.

Institution: International Centre for Mechanical Sciences (CISM), Italy.

2023: Academic Leadership.

Description: The course is structured into 4 modules: i) Leadership intelligence, ii) Where does your university stand? What is the role of the leader? iii) People-centered leadership, iv) Communication and feedback.

Institution: European Academy of Innovation, Romania.

2023: Structural Health Monitoring for integrity management of civil structures and infrastructures.

Description: The course is structured into 4 modules: i) Fundamentals of SHM, ii) Model-based methods for damage identification, iii) Machine learning methods for condition assessment, iv) SHM for decision support.

Institution: Politecnico di Milano, Italy.

2019: Conservation Without Frontiers International Summer School.

Topic: Survival & Revival: Living Towns and Villages in Cavan and Fermanagh.

Institutions: Ulster Architectural Heritage and Irish Georgian Society, Ireland.

2018: BASEhabitat International Summer School on Earthen and Bamboo Construction.

Topic: Practical workshops in building with earth and bamboo, theory classes on sustainable architecture and networking with people from all around the globe.

University: University of Linz, Austria.

Research oriented:

- 2023:** C.1 - Research and Innovation Project Management: The First Steps
Awarded by: The Research Council of Norway
Description: Introduction to the life cycle of an EU project; how to start up the project, as well as reporting and management along the way.
- 2023:** A3- Looking for partners and joining consortia
Awarded by: The Research Council of Norway
Description: What type of partners to look for in Horizon Europe? And what characterizes a winning consortium in Horizon Europe?
- 2023:** Research Design.
Awarded by: Elsevier Researcher Academy.
Description: Identifying research gaps, advancing research evaluation strategies.
- 2022:** IOP Peer Review Excellence.
Awarded by: IOP Publishing.
Description: A first-of-its-kind peer review certification programme, Peer Review Excellence: IOP training and certification is co-delivered by top-level physicists and offers a blend of online learning and hands-on peer review experience. Achieving '*IOP trusted reviewer*' status demonstrates an exceptionally high level of peer review competency.
- 2022:** Book writing.
Awarded by: Researcher Academy, Elsevier.
Description: Why you should publish a book, advice on writing a compelling proposal, ideas for promoting your work.
- 2022:** Technical writing skills.
Awarded by: Researcher Academy, Elsevier.
Description: Practical advice to get you started, guidance on using the system, some golden rules, and common mistakes.
- 2022:** Writing skills.
Awarded by: Researcher Academy, Elsevier.
Description: Information on common writing mistakes, advice on how to avoid those errors, a guide to correct manuscript language.
- 2022:** Fundamentals of manuscript preparation.
Awarded by: Researcher Academy, Elsevier.
Description: An introduction to the publishing process, insights into how to build an article, top tips for writing a great abstract.
- 2022:** Research collaborations.
Awarded by: Researcher Academy, Elsevier.
Description: Advice on how collaborate with industry, guidance on making research collaborations work, an introduction to the importance of collaborations.
- 2022:** Research data management.
Awarded by: Researcher Academy, Elsevier.
Description: Why data sharing is so important, an introduction to data management plans, information about the sharing solutions on offer.
- 2021:** Research funding.
Awarded by: Researcher Academy, Elsevier.
Description: Advice from experts on funding, guidance on writing a great application, an introduction to metrics.
- 2019:** Certified Peer Reviewer Course.
Awarded by: Researcher Academy, Elsevier.

Description: Understanding of the peer review process, advice on writing a helpful peer review report, advice on handling ethical issues concerning peer review.

Completed massive online open courses:

- Getting Started with Mentimeter: Beginner's Course, Mentimeter Academy, Sweden.
- Co-Creation for Policymakers: An Introductory Course, Politecnico di Milano, Italy.
- Preserving Norwegian stave churches, National Technical Norwegian University, Norway.
- The art and science of searching in systematic reviews, National University of Singapore, Singapore.
- Deep learning with TensorFlow, IBM, USA.
- Web applications and command-line tools for data engineering, Duke University, USA.
- Scripting with Python and SQL, Duke University, USA.
- Python and Pandas for data engineering, Duke University, USA.
- Linux and Bash for data engineering, Duke University, USA.
- HTML, CSS, and JavaScript for Web Developers, Johns Hopkins University, USA.
- Machine learning, University of Sandford, USA.
- Construire en terre crue aujourd'hui, Amaco, France.
- Introduction to Python, Microsoft, USA.
- Roman architecture, Yale University, USA.
- The ancient Greeks, Wesleyan University, USA.
- Rome, University of Reading, UK.
- Cultural heritage in transformation, RWTH Aachen University, Germany.
- Arts and heritage management, Bocconi University, Italy.
- Next generation infrastructures, TU Delft, Netherlands.
- The art of structures, Polytechnic University of Lausanne, Switzerland.
- Future smart cities, Swiss Federal Institute of Technology in Zurich, Switzerland.

21. Professional Experience

01/02/2020 - 31/10/2020: Structural Engineer and leader of R&I.

Company: Xstructuras Ingenieria, Mexico.

Activities: Modelling, analysing, designing, and detailing of steel, concrete, and masonry buildings. Working in and coordinating teams, liaising with architects and clients to ensure the completion and success of projects on time and within budget. Research and implementation of SOA BIM software and working methodologies.

01/09/2014 - 31/08/2015: Structural Engineer.

Company: ALBA Proyecto Estructural, Mexico.

Activities: Modelling, analysing, designing, and detailing of steel, concrete, and masonry buildings. Working in and coordinating teams, liaising with architects and clients to ensure the completion and success of projects on time and within budget.

01/08/2014 - 31/08/2014: Structural Engineer.

Company: Ceromotion, Mexico.

Activities: Modelling, analysing, designing, and detailing of steel, concrete, and masonry buildings.

22. Professional Certificates

2015: Certificate on the Analysis and Design of Post-Tensioned Buildings.

Institution: ADAPT Professional Training Institute.

Description: Three-day intensive educational course on the analysis and design of post-tensioned buildings.

23. Volunteering

2013-2014: TECHO Building Volunteer.

NGO: [TECHO](#).

Activities: Building emergency houses for families in need.

24. *Skills*

Leadership:

- Effective communication, task prioritizing, time management, attention to detail, problem-solving, relationship-building, conflict resolution and delegation.

IT:

- Skills with structural engineering design software: OpenSees, SAP2000, ETABS, SAFE, ANSYS, ABAQUS, AutoCAD, Revit, Robot, Advance Steel, FormIt, SeismoSignal, Prodisis, Sasid, ALMA.
- Skills with statistical software: Minitab, SPSS.
- Skills with bibliometric software: VOSviewer.
- Skills with programming languages: MATLAB, Python, VBA, XML, HTML, CSS, JavaScript, SQL.
- Skills with developer software: VSCode, Spyder, Vim, Git, GitHub, Docker, Windows Terminal, Anaconda.
- Skills with other software: Word, Excel, PowerPoint, Outlook, Project, Visio, Survey Monkey, Prezi, EndNote, LaTeX, Mendeley, JabRef, Paraview, GIMP, Inkscape, kdenlive, LibreOffice, Mentimeter.

Languages:

- Spanish: Native.
- English: Advanced.
- French: Intermediate.
- Italian: Beginner.
- Norwegian: Beginner
